Project Overview
Cresthaven Village, Phase 3
Planned Development
Case Number 2015-39
Concept Plan

Planned Development Concept Plan
Informational Statement

The proposed development is the third and final phase of the Cresthaven Village project. The homes will be located within a Gated Community with Single One-Story units ranging from 1,300 square feet to 3,000 square feet in living area, complete with two (2) car garages (Single being one unit per rooftop). The Development area is currently zoned SF-10. The Planned Development (PD) proposes to use the MF zoning district as the basis for the development, as it was in the previous phases, in lieu of the current SF-10 zoning.

The project will continue the development approach taken in the previous two phases and will be designed with the needs and requirements of seniors in the 60 plus age group as its criteria. The area will have close proximity to existing retirement facilities, whose services, food, meeting rooms, hobbies, etc., could be utilized on an as needed basis and is encouraged by the retirement facility management.

The Phase 3 development will be enclosed within a beautiful masonry screening fence just as Phases 1 and 2 are. The main access will be provided by the existing gated entry from Covenant Street. Secondary access is through a gated entrance from Old Clark Road. Phase 3 will have a minimum of 0.25 acres of open space for the residents. They will also have full access to over three acres of open spaces on the west and east perimeters of the previous phases. The exterior elevations of these units will be comparable with units constructed in Phases I and II.

The lighting will meet or exceed the required minimum for streets, walking paths, open green areas, off-street visitor parking and entries. There will be a minimum of interior fencing to emphasize the open area concept.

All structures will be 80% brick veneer. Phase III will include twenty-two (22) single units and two duplex units on private streets. This results in a density of approximately 4.3 units per acre.

The streets, water, sanitary sewer and storm drains will all comply with Cedar Hill City Standards.

The development will be under the control of a Homeowner’s Association that will take care of insurance, lawn care, repair of streets, security and outside home maintenance. There will be a sprinkler system for landscaping. Landscaping in street yard will comply with M.F. District. All homeowners will be required to be member of the Homeowner’s Association and pay dues according to the square footage of their home. This is estimated to be in the range of $0.07 to $0.10 per square foot per month at the present time.
