

## Cedar Hill Government Center A unique and efficient solution

The new Cedar Hill Government Center is the only known facility in Texas to house City government and school district offices in the same building. Sharing the building will save taxpayers money and be a benefit to the community.

Shared spaces, like conference rooms, break rooms, lobby and reception areas, parking lots and technology infrastructure will save nearly \$4 million in construction costs, and should show operational savings for many years to come.

The \$27.5 million cost is

funded by bonds approved by voters for new school district and City offices.

The 116,000 sq. ft. facility will house CHISD offices, most offices of City government, and will include police headquarters. The existing police facility will be remodeled for community service operations.

Several other departments will be moving from satellite locations into the new City offices. The Economic Development Corporation will be moving from leased space in the Bank of America

## Quicker alarm response can save lives

Cedar Hill's Southwest Regional Communications Center provides emergency 911 response and dispatch services.

SWRCC also offers home and business alarm monitoring. The Center uses emergency dispatchers to provide the quickest alarm response available.

Reporting residential or business alarms directly to the local 911 emergency dispatcher saves valuable and possibly life-saving time.

Traditional alarm companies require an extra step that consumes valuable time. After receiving an alarm signal, they must call the local 911 center

and verbally pass the information to the dispatcher, who in turn sends the appropriate police, fire or medical unit to respond.

To offset the cost of programming an alarm to the SWRCC network,

they are offering three months of free monitoring service.

Another alarm system issue is recent Federal Communications Commission radio band changes that may affect services relying on analog cellular radio

equipment.

Wireless alarm systems installed before 2006 generally used analog equipment. Systems should be checked by a professional alarm technician.

Another problem is residents who are using voice over internet protocol (VOIP) phone services. Tim Smith, managing director of SWRCC, said "Most VOIP providers

will not support alarm systems.

More information, and a list of alarm system professionals is available at [www.swrcc.net/alarm](http://www.swrcc.net/alarm) or call 972.223.6111, or call Smith directly at 972.230.5053

## Get rid of dangerous chemicals

Bring your dangerous, yucky stuff to the Hazardous Household Materials Disposal event Saturday, March 22, from 9 to 11 a.m. in the High School parking lot.

This City-sponsored event is a free solution for disposing of unwanted household chemicals, lawn and garden chemicals and other dangerous items. Proof of residency is required.

Accepted materials include: acids, aerosol cans, antifreeze,

brake fluid, craft/hobby chemicals, degreasers, drain cleaners, fertilizer, fluorescent lights, herbicides, motor oil, paints/stains, paint thinners, pest strips, pesticides, pharmaceuticals, photo chemicals, pool chemicals, oil filters, solvents, transmission fluid, varnishes.

Unacceptable items are: ammunition, explosives, medical waste, propane and butane cylinders, radioactive materials (smoke detectors), tires and business waste.

For your safety, and to expedite the unloading process, please keep chemicals in their original containers. Place leaking containers in a second container of like material. If a container has no label, please make a label or clearly mark the contents.

Do not transport chemicals in the passenger compartment of your vehicle.

Materials will be unloaded for you at the collection event.

## Retail center opens

Uptown Village at Cedar Hill combines the best attributes of an open-air shopping environment and a diverse mix of shopping and dining venues. Its unique design and superior location satisfy the demands of the increasing population of educated and affluent customers in Cedar Hill and surrounding areas.

It's not all about shopping. Included in the 725,000 sq. ft. center will be retail, of course, but there will also be a number of restaurants, unique office space and attractive and entertaining public areas. Following the Grand Opening this month, buildout will continue through the summer.

At a recent City Council meeting, Gail Thompson, the marketing director for the site, described some of the amenities included in the center: A 2,500 sq. ft. children's play area, a village green with an interactive fountain and smaller fountains, a chess and checkers set with almost human-sized chessmen, bronze sculptures and more. The green will have artificial turf and be pet-friendly, including water bowl areas and pet pick-up stations.

The public spaces are designed to integrate the center into the community by hosting many types of special events of interest to residents and visitors.

The center has entrances from FM 1382, Hwy 67, Pleasant Run Road and Cedar Hill Road,

## Amazing Spray Gator: innovative and efficient

The Cedar Hill Parks Department is known for premiere service and innovative use of technology. Staff responsibilities include preparing and maintaining the athletic fields each week. Part of the preparation includes marking straight, clean lines on each field. If the field has been measured, it takes a crew of two experienced workers about 1.5 hours, using a walk-behind machine, to mark the lines of each field.

Lupe Ramirez, Florentino Noyola and Shawn Ray realized there must be a more efficient way to mark the fields. They had a John Deere Gator, a utility vehicle used in many parks applications, and decided they would combine it with the walk-behind line sprayer.

They recycled the metal push bumper of a scrapped vehicle to serve as the front anchor point for the nozzle bar. The spray machine is mounted in the rear compartment. A growth inhibitor mixed with the paint extends the time between markings to every other week.

As a result of creative thinking, combined with mechanical skill, the Amazing Spray Gator reduces the time for marking fields from 66 man hours to 11 man hours! The Spray Gator is an example of City staff innovation that results in convenience and efficiency while addressing environmental concerns (reuse, recycle, reduce).

## Government Center *from front page*

building. Code Enforcement, Information Technology, Parks & Recreation, Planning, Building Services and a portion of the Public Works staff will be relocating from other buildings into the central facility.

The current City Hall was built in 1961 and the CHISD Administration

building was built in 1956. Babe's Chicken Diner House will be moving into the old City Hall and is expected to bring some new vitality to the downtown area.

City officials expect to move into the new building in July. School district officials may move later in the summer.

## City site speeds up hiring

On the new City website ([www.cedarhilltx.com](http://www.cedarhilltx.com)) job applicants can apply online by clicking "Employment." The entire application/resume process is online. No forms are mailed or faxed.

We asked Tracey Tso in Human Resources how it has improved the hiring process.

### Why is it better?

The City can now reach a larger pool of job applicants while potential employees can quickly and easily apply for all the positions for which they are qualified.

### How does the volume of applicants compare?

The volume of applications has more than doubled. We no longer have to advertise positions as often, which saves the City a lot of money.

### What are the advantages to the applicants?

They no longer have to come to City Hall to apply in person or fax in their application.

### Has this system streamlined your operations?

Applicants must apply for an open position. This eliminates the applications we used to receive from those who wanted us to keep them on file for future openings. Applicants receive an automated response letting

them know that their application has been received. We used to send postcards. Online applications are typed, thus easy to read.

### How has it benefited those who make hiring decisions?

They get more applications to choose from in a short amount of time.

### Are we saving time?

Yes, because of the volume of applications we receive online, we are able to close positions quicker. Also, the time to post a position has been reduced from 20 minutes to 2 minutes.

### What feedback have you heard from applicants?

They are very grateful for the ability to apply online. They also like the e-mail feature that alerts them to new openings.

### Would you like to go back to the old system? No!
